

AME

BMW R1200 C

The new

Cruiser Feeling

The BMW Cruiser in a new design

AME modification with EU approval

The new R1200C Cruiser is the result of an extraordinary collaboration between AME and the successful designer T. George. Based on the reliable BMW technology, AME's exclusive design plus its various individual modification opportunities are now to satisfy the Cruiser customer.

Pure cruising fun, individuality and high quality unified in the new AME BMW R1200C.

Simply convince yourself.

Experience the astounding stretched and low finish of the AME Cruiser.

The modified BMW - Telelever solution alone results in a 9° lower front end appearance without having any constructive changes of the existing BMW framework.

The harmonic and fluent design line of the AME Gastank-Seat-Rear End combination with its 200/50-17 tire and the showchromed 6" spoked wheel finally characterizes the AME Cruiser's dynamic and powerful appearance.

AME - BMW R1200C - Cruiser
